

## **GFirst LEP Business Groups Update: June 2019**

The **Chairs of all the Business Groups** met at the University of Gloucestershire on Monday 25<sup>th</sup> March 2019.

David Owen outlined the importance of working collaboratively with the Business Groups in the development and delivery of the Local Industrial Strategy (LIS). GFirst LEP has 75% private sector representation on its Board, which provides a great foundation because the LIS is to be business-lead, whilst also getting the local Government areas engaged in the Strategy. The call for evidence for data to support the Local Industrial Strategy went out on 21<sup>st</sup> March and is open until 31<sup>st</sup> May.

Other updates from GFirst included:

- ERDF funding for an Inward Investment Team who will work to identify non EU SMEs looking to locate into the county, as well as county-based companies who are looking to expand overseas.
- The expansion of the Education team to include Enterprise Co-ordinators and a SEND co-ordinator
- The recruitment of a Senior Research Manager Jute Blackmon to support the Local Industrial Strategy data collation.
- The development of the county's sustainable energy strategy
- Update on the growth hub network
- Future High Streets funding

GFirst will encourage discussions and presentations from other sector groups, to encourage 'cross-pollination' of topics and avoid any silos. The majority of the meeting was used to discuss the Local Industrial Strategy, so more detailed discussions from the Chairs in relation to their group summaries will be prioritized for the next meeting.

*The date of the next Business Group Chairs Meeting will be **Monday 14<sup>th</sup> October 2019** at the Gloucester Growth Hub.*

## Advanced Engineering & Manufacturing

All three new Growth Hubs will be Tier 2 in size. The GFirst Annual Review will take place at the Gloucester Growth Hub on Thursday 19th September and all are invited to attend. Core sectors that are identified as areas of strength for the team are: Advanced Engineering and Manufacturing/Cyber/Agri-Tech and Renewable Energy. A minor grant scheme could be of benefit to non-EU start-ups with help in relocating to Gloucestershire. The team are currently recruiting and would benefit from someone with advanced engineering and manufacturing experience. Chris asked the group for permission to use high resolution images for the Inward Investment website, including the timelapse video of the new Dowty factory in Brockworth.
- All business group members gave an update on their business. Brexit is having an impact on longer term plans but not so much on shorter term developments. Some of the group had worked with them in the past and had implemented positive changes resulting in higher productivity levels.

*The date of the next AEM meeting will be Monday 7<sup>th</sup> October at GE Aviation, Bishop's Cleeve.*
